

# TAMIR EILON

As a DevOps engineer with a holistic perspective, I am deeply committed to collaborative teamwork and possess a strong foundation in the principles of DevOps. With a keen sense of organization and resourcefulness, I thrive on creating efficient and automated solutions within the realm of software development.

## Experience

---

### System Administrator

IDF - "Efraim" Territorial Brigade, 2020-2022

- Assist as a certified network administrator and Helpdesk assistant, while operating with classified computing environments and advanced systems.
- Successfully led a team of 4-5 personals as a system administrator, coordinating tasks, setting objectives, and ensuring mission-critical systems were operational.
- Maintained vital military systems, quickly diagnosing and resolving technical issues to ensure uninterrupted operations in high pressure & classified scenarios.

### System Engineer

IDF - Classified Unit, 2022-2023

- Create, support and maintain reports, and dashboards to monitor performance and track anomalies in servers and cloud services using "Splunk", as well as SQL, Linux and others.
- Serve as a high-level provider, Providing support to all military aspects in operational matters only and classified programs and cloud services around the clock.

## Education

---

### System Administrator Course 2021

As part of my military service, I took a 4-month long system administrator course in the IDF's "Cyber & Network" teaching facility, where I gained expertise in configuring and managing complex computer systems, honing skills in system troubleshooting, software installation, security protocols, and network administration.

### DevOps Course 2023

During a 6-month DevOps course at "Sela" College, I mastered the intricacies of CI/CD pipelines and deployment automation using "Jenkins" and "GitHub Actions" More over, I learned all about cloud Infrastructure management and usage with AWS and GCP. I gained hands-on experience with DevOps tools, fostering collaboration between development and operations.
